Ride often, Ride Safe

RIDER EDUCATION

By Ed Johnson

Winter Riding

Winter is about here and presents some challenges to riding that motorcycle. Here are some things to watch out for while out on the roads.

A couple of weeks ago I drove to Nashville, and between here and there on I-40 I saw five dead deer and three live ones. The deer population has exploded, so watch out for them, especially early morning and late evening.

We've had frost so the leaves have mostly fallen from the trees. Guess where they are? Many are on the roads, walkways and parking lots. Leaves can be hazardous to ride a motorcycle on because they reduce your traction.

With temperatures going up and down, your tires sometimes have a tendency to lose air. Check your tire

pressure regularly. That goes for your car tires also.

Keep windshield and visors clean to reduce the glare from the Sun as it rises later and sets earlier. It won't be long until the days start getting longer, a little at a time.

Remember the temperature can fall quickly when the sun goes down. Be ready with a jacket or additional layers of clothing. Wind chill can cause you a lot of problems if you are not prepared. Not only is it uncomfortable, it can cause your reaction times to go up. You think more about being cold than you do about things around you.

As always, the better you prepared you are, the more you are going to enjoy your ride.

Take care and ride safe.

CHUCK WINS THE BIG BUCKS!!!

After drawing the correct marble, Chuck was presented with \$160 which he refused to share with anyone. Although, Audrey said she was taking it shopping. So, I doubt that he still has the money!
